## PROJECTS

Aug 2022

### **PERSONAL | Discord bot - Sibyl System**

- Built a Discord bot with Python and Discord API
- Designed it to respond to commands, send automated messages through Webhook, as well as to handle errors

May 2022

### **PERSONAL | Pokédex**

- Developed a responsive web application using JavaScript, EJS, Node.js and Express that allows users to find information about Pokemon
- Implemented search functionality with AJAX, login/out with express-session and encrypted users' passwords with bcrypt

Mar 2022

### **HACKATHON <Front End Developer> | NoteHub**

- Competed in a team of four to solve STEM-based problems
- Built an MVP of a web application in 24 hours using JavaScript, EJS and CSS where students can share notes and code snippets
- Designed UI/UX using Figma and worked on the front-end of the app

Apr 2022

### **ACADEMIC <Full Stack Developer | Project Lead> | SwapOmen**

- Developed a mobile-first web application using HTML, CSS, JavaScript, Node.js, Express and MySQL that allows users to trade items/services
- Worked with a team of four, utilising the agile development process
- Monitored progress, adjusted backlog and made sure the team met all the deliverables

## EDUCATION

Jan 2022 - Apr 2024

### **Computer System Technology | GPA: 92%**

British Columbia Institute of Technology - Vancouver, BC

- Learning software engineering and programming from industry professionals and working on real projects from concept to development
